MPP Solar Roof Sponsorship / Rebate Application Checklist

Thank you for your interest in our solar roof sponsorship! To learn more about the program please read the following post on our website. Updates and news will be added to this post in the future:

<https://www.MountainPassPerformance.com/solar-roof-giveaway>

Eligibility:

If you were a customer of Mountain Pass Performance prior to June 1st 2021 and you still own an electric vehicle as your primary mode of transport, you are eligible to apply (*see post for full details and rules*).

Application Checklist:

- Cover Letter or email explaining why you would be the ideal candidate for a sponsored solar roof, and how you think you could help promote clean energy in your community and how much of a “snowball” effect you think this solar roof might be able to have for others installing solar in your area.
- 2 quotes for a complete solar installation over 5kW including the following:
 - Solar Panels
 - Inverter with online monitoring capabilities
 - Racking, Installation and commissioning
 - Electrical inspections and building permits
 - Connection to the grid along with required applications/permits for a net-metering system
- An overview of the projected energy production of the system. This is normally provided by the solar installation company when providing a quote.
- A picture of the roof and any objects that would be partially or fully shading the solar panels. Google maps also works if you would like to share your address (not required). This is also normally provided by the solar installation company when providing a quote.
- Proof of the carbon intensity of your current electricity supply. This will be used for us to determine the environmental impact that will be gained by installing a solar system at your location.

Applications that are complete and organized will have priority. Please include the following in your application and email it to info@mountainpassperformance.com. Thank you and good luck!

Remember that even if you don't win, investing in a solar roof is good for the climate and a decent financial investment, so you can always pull the trigger even if MPP isn't paying for your roof!
